

ANDREA BRUNO

frontend developer · Trieste, IT

brnr.dev <https://github.com/baronunread> <https://x.com/baronunread>

EXPERIENCE

2025 Frontend Developer · Opencontent SCARL

I handle a real analytics stack with ClickHouse, events on Kafka and dashboards in Metabase. On the side of development I'm also involved in projects using AI in POCs and production.

2021 Junior Software Developer · Opencontent SCARL

I worked with JavaScript and a custom fork of form.io, designing forms for public digital services. I also handled customer support and wrote Google Sheets scripts to automate the data analysis of the incoming tickets.

201X Informatics · University of Udine

I studied informatics at the University of Udine but I did not graduate. However, it was a formative experience where I learned more about the world of software development.
